

To Whom this may concern,  
I would like to voice my opinion about the possibility that XM may loose the right to broadcast weather and traffic. I would hate to see this happen since it is a very comveinient way for me to find this information at a moments notice. I don't have time to wait for broadcasts from music stations or news channels. I have come to expect it from XM since I pay for their quality service. I hope that you good folks at the FCC will reject the NAB's petition 04-160 to stop XM and allow them the ability to provide this most valuable service.

Sincerly,

Howard Paskow
